*Organization:

*Number of interns for this position? *Date student(s) can start:

*Address:

*Description of organization:

* Description of position. List the tasks, projects and/or assignments the student(s) will be working on; include any special requirements such as evening or weekend hours.

*Special skills required/desired (e.g., statistics, GIS, command of a language in addition to English):

OPTIONAL SURVEY QUESTION: The 21st century's mounting social, economic and ecological problems are pressuring universities worldwide to do more civically-engaged, solutions-oriented research. Consequently, new types of university-community partnerships are forming to address a wide of challenges (e.g., food and water security, the green energy transition, affordable housing, social justice and environmental health). We'd like to know what your organization's relationship is with the world of research.

Do you have any significant ties with universities or research centers in the San Diego-Tijuana region? Does your organization have particular needs right now for certain data, information, or knowledge? What specifically would you like to see high on the "action research" agenda of our region's universities? (Action research is use-inspired, evidence-based, and problem-solving; it is conducted by researchers and community-based partners working collaboratively, shoulder-to-shoulder, with common cause in applied settings). If you choose to address this survey question, Professor Pezzoli will follow up with you to discuss your suggestions.

If you are able, please use the online, password protected, version of this form at <http://www.seniorsequence.net/index.php/partners/> (username = partners, password = interns).

Hard copies should be sent to:

Keith Pezzoli, Ph. D.
University of California, San Diego
9500 Gilman Drive
Urban Studies and Planning Program, 0521
La Jolla, CA 92093-0521

If you have any questions, call Professor Pezzoli at 858-534-3691 (office), 858-735-3012 (cell).
